

THE PACIFICA ADVANTAGE...ALL VINYL WINDOWS AND PATIO DOORS

## SINGLE HUNG WINDOWS

### All Vinyl Single Hung Windows

- Vinyl frames require no painting or staining like wood windows.
- Durable vinyl frames will not blister, corrode, flake, peel or rot.
- Vinyl is resistant to the harsh effects of the weather, direct sun, pollutants, and corrosive salt air.
- The attractive, clean and uncluttered appearance of vinyl windows will complement and enhance the beauty of any style home.
- Fusion welded, all vinyl frame and sash allow for superior strength and energy efficiency.
- Equal glass in both sashes for more pleasing sightlines.
- Interlock at center rail provides a tighter seal against air and water infiltration.
- Fully weatherstripped against wind, rain, dust and outside noise.
- Chambered, dual wall, exterior flush fin for ease of installation and aesthetic appeal.
- Custom sizes available.
- Grid options and configurations available.

*Fusion welded sash and frame combined with a thermally efficient design and insulating glass package create a window that performs as well as it looks, providing strength and durability in a cost competitive window.*

## SLIDING WINDOWS

- Multi-chamber design for optimum thermal efficiency.
- 100% virgin vinyl won't chip, crack, peel, or warp.
- Color throughout the vinyl material means a worry free surface that never needs refinishing.
- Full 3/4" insulated glass unit for year round energy savings.
- Full length integral interlocks to help block air infiltration.
- Tandem metal, adjustable rollers for years of easy operation.
- Aluminum framed screen.
- Color matched handles.

*Only the very highest quality weather resistant hardware and rollers are used in the manufacture of all Pacifica sliding windows. This ensures that all operating sashes will smoothly open and close.*

## PICTURE WINDOWS

### All Vinyl Fixed Windows

As with all of our operable windows and door products, Pacifica picture windows are fabricated from the same high quality multi-chambered vinyl profiles and use the same energy efficient glass package. These fixed units have a fully compatible sightline with our other vinyl products. This means that you can combine hungs with fixed window units to create a truly dramatic focal point in any room.

*Pacifica makes the highest quality vinyl windows and doors in full range of shapes and styles. Pacifica windows are made from top of the line VEKA vinyl profiles. These window units are environmentally friendly and energy efficient. Also easy to operate, have a tight seal, and never needs to be painted.*

## SLIDING PATIO DOORS

1. Multi-chamber design for optimum thermal efficiency.
2. 100% virgin vinyl won't chip, crack, peel, or warp.
3. Color through material means a surface that never needs refinishing.
4. Full 3/4" insulated glass unit for year round energy savings.
5. Full length integral interlocks to help block air infiltration.
6. Tandem metal, adjustable rollers for years of easy operation.
7. Durable, stylish, roller track for ease operation.
8. Aluminum framed screen.
9. Keyed lock for color matched handles.
10. Dual mortice locks for added security

*Sliding Patio Doors from Pacifica are unmatched when it comes to advanced design features that ensure you're getting one of the most structurally sound, energy efficient and easy to operate doors available today.*

## ENERGY EFFICIENT TECHNOLOGY

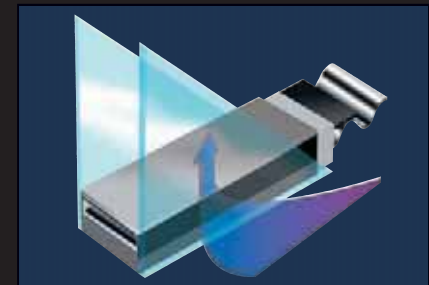

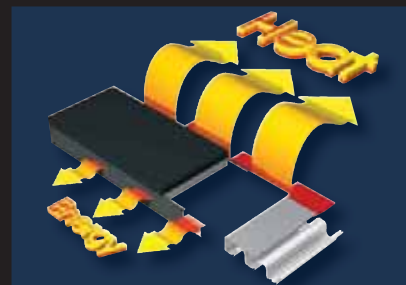

All Pacifica windows begin with lead-free PVC lineals from VEKA, a global leader in extrusion technology for over 40 years. We use vinyl profiles because they are non-conductive and performance additives ensure a lifetime of color stability, impact and weather resistance. PVC, unlike wood, aluminum or fiber glass are corner welded for additional strength. Welded corners unlike traditional mechanical fastening greatly reduces air and water infiltration.

Multi-chambered vinyl profiles have the added benefit of not only offering more weld surface but also creates dead-air spaces which act as a natural insulator providing your family additional indoor comfort and energy savings. The weather resistant surface will not chalk, chip, peel or rot. The color throughout means that any scratches will be nearly invisible.

Low maintenance VEKA vinyl will clean with a mild household soap and water and will never need to be painted or chemically treated.

Duraseal insulates the frame and edge of glass up to 90% better than aluminum spacer bar and 50% better than Intercept® spacer system.. Duraseal takes optimum advantage of laminates and adhesives to reduce thermal conductivity while improving surface and corner appearance over other insulating glass spacers. This multi-layered spacer system featuring specialized components results in superior window performance and aesthetics over other warm edge spacers. Test results performed by a third party validate the superior thermal performance benefits of Duraseal when compared to other spacers.

## LoE2-270® Glass

Since the majority of solar heat gain comes through your windows, choosing the right glass can be a key factor in comfort and year-round energy savings.

LoE2-270® glass is the perfect solution for all season comfort. It reduces solar heat gain by 50% or more when compared to ordinary glass. Although it is a clear glass, LoE2-270® even outperforms ordinary tinted glass, typically used in sunny climates. And though it's coated, LoE2-270® lets the light shine in to warm your house during the cooler winter months.

*Energy Star Climate Region Map gives you clear guidelines for determining which windows and doors will do the best job to help reduce heating and cooling costs in your region - and your home.*

## Accent Grids

Enhance your new window purchase with accent grids

5/8" Flat grid

1" Contour grid

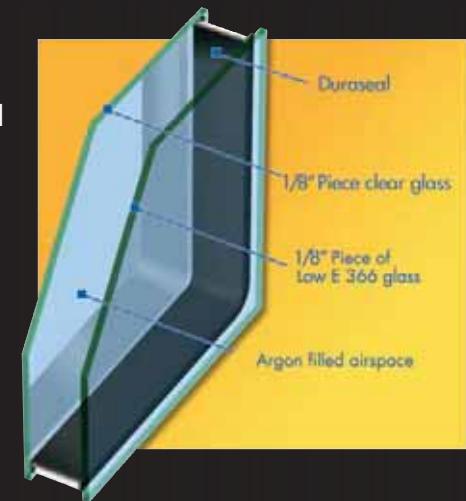

## LoE3-366® Glass A new standard

LoE3-366® glass is our ultimate in performance and clarity among all clear coated products. LoE3-366® delivers the ideal balance of solar control and high visibility. It provides the highest levels of year-round comfort and energy savings, making it the perfect glass no matter where you live. LoE3-366® blocks 95% of the sun's damaging ultraviolet rays - a leading cause of fading - so your furniture, carpets, curtains and wall coverings stay beautiful for years.

These insulated glass units with a patented spacer system, dual seal technology and a triple layer of silver create superior insulated units which have an almost zero failure rate.

3/4" overall thick dual pane unit consisting of one Low-E 366 and one clear pane with Duraseal spacer and argon fill.
